FORD/F-450 SD/2017-2018

**Mfr's Report Date:** November 29, 2022

**NHTSA Campaign Number:** 22V-880

**Components:**

POWER TRAIN:DRIVELINE:DRIVESHAFT

**Potential Number of Units Affected:** 18,808

**Problem Description:**

Ford Motor Company (Ford) is recalling certain 2017-2018 F-Super Duty F-250, F-350, and F-450 4x4 vehicles. A radial damper inside the driveshaft may move out of position over time, which can cause a driveshaft imbalance and result in a fracture.

**Consequence:**

A fractured driveshaft can cause a loss of drive power. Additionally, a vehicle rollaway could occur while parked if the parking brake is not engaged. Either of these scenarios increases the risk of a crash.

**Remedy:**

Dealers will replace the driveshaft, free of charge. Owner notification letters are expected to be mailed January 9, 2023. Owners may contact Ford customer service at 1-866-436-7332. Ford's number for this recall is 22S74.

**Notes:**

Owners may also contact the National Highway Traffic Safety Administration Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153), or go to [www.nhtsa.gov](http://www.nhtsa.gov).

We have received Ford's proposed owner notification letter and it is currently under review. You will be notified of any changes or concerns once our review is complete.

Please be reminded of the following requirements:

As stated in Part 573.7, submission of the first of eight consecutive quarterly status reports is required within one month after the close of the calendar quarter in which notification to purchasers occurs.
