THE REMEDY FOR YOUR VEHICLE IS NOW AVAILABLE

Dear Kia Niro EV Vehicle Owner:

Kia has identified a defect in your vehicle which relates to motor vehicle safety.

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Kia America, Inc. has decided that a defect which relates to motor vehicle safety exists in certain 2020 MY Niro EV vehicles. The defect can result in vehicle stall while driving, thereby increasing the risk of crash. Our records indicate that you own or lease one of the potentially affected vehicles. **The remedy is now available for your vehicle.**

What Is The Problem?

The Electric Power Control Unit (EPCU) assembly in your vehicle may have been produced with improper sealing. Due to this improper sealing, coolant can internally leak in the EPCU and contact the EPCU circuit board. If this condition occurs, your vehicle may stall while driving. A vehicle stall increases the risk of crash.

Kia Will Inspect and, If Necessary, Replace the EPCU Free of Charge At No Cost To You.

Your Kia dealer will inspect the Electric Power Control Unit (EPCU) for internal coolant leakage. If coolant leakage is identified, the EPCU will be replaced with an improved one. If coolant leakage is not identified, no additional repairs will be necessary. This recall will be performed **free of charge at no cost to you**. The estimated time required to perform the recall will be approximately one (1) to two (2) hours. We recommend scheduling a service appointment to minimize your inconvenience.

What Should You Do?

- **WARNING:** The "Check Electric Vehicle System" warning light may illuminate if internal coolant leakage occurs within the EPCU. If this happens, pull over to a safe location and turn OFF the engine. **Contact Kia Roadside Assistance at 1-800-333-4542 or online at kia.rsahelp.com to request to have your vehicle towed to the nearest authorized Kia dealership as soon as possible.**
