Audi Recall: 50ZZ – Safety Certification Label

INTERIM SAFETY RECALL NOTICE FOR YOUR VEHICLE

A recall repair is not yet available

This notice is sent to you in accordance with the *National Traffic and Motor Vehicle Safety Act*. Audi has decided that certain 2023 model year Audi vehicles fail to conform to 49 CFR Part 567 – Certification. Our records show that you are the owner of a vehicle affected by this action.

About this recall:

The Safety Certification label (located on the B-pillar) does not have the required weight information/specifications printed on it. This makes the label noncompliant with regulatory requirements. Missing weight specifications can cause someone to overload the vehicle. Overloading a vehicle increases the risk of a crash.

A recall repair is not yet available.

Audi is working to make a recall remedy available as quickly as possible, and we will send you another letter once this work can be completed. At that time, you will be able to schedule this work with your authorized Audi dealer. Right now, your dealer does not have the parts or instructions to perform the recall work.

In the interim, we are providing you with the missing information applicable to your specific vehicle. Please refer to the information below. We ask that you ensure all vehicle operators are made aware of this information, and recommend keeping this letter with your vehicle owner's manual for future reference.
