

New Safety Recall Advanced Communication – 21A

FCA US LLC (FCA US) has announced a safety recall on certain Anti-lock Brake System (ABS) Hydraulic Control Units (HCU)s part number 68085397AB intended for use on some 2011 - 2022 (WK) Jeep Grand Cherokee and 2011 - 2020 (WD) Dodge Durango vehicles.

REASON FOR THIS SAFETY RECALL

Some of the above HCU / ABS modules may falsely read pressure in the primary circuit. When installed in a vehicle, an HCU / ABS module which falsely reads pressure in the primary circuit may illuminate the brake lights, as well as allow the vehicle to start and shift out of park without the brake pedal being depressed. This condition can cause unintended vehicle movement which can cause a vehicle crash without prior warning and/or injury to others outside the vehicle.

SERVICE ACTION

FCA US will conduct a voluntary safety recall on all affected parts to repurchase suspect HCUs. If installed on a vehicle, FCA US will replace the HCU. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2023.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
