

IMPORTANT SAFETY RECALL
NHTSA Recall 23V-017

This notice applies to your vehicle, [REDACTED]

FEBRUARY 2023

Dear Customer,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Your vehicle [REDACTED] 2022 model year Isuzu N-Series vehicle is involved in safety recall NHTSA 23V-017.

WHAT IS THE CONDITION?

Isuzu Motors Limited has decided that a defect, which relates to motor vehicle safety, exists in certain 2022 - 2023MY Isuzu N-Series Diesel Vehicles produced after 7/26/2021 with RPO Code EM2 or EL5 (200" or 212" respectively) Wheelbase Factory Modifications. When the subject vehicles were modified to extend the frame, the Anti-lock Brake System (ABS) module and Advanced Driver Assistance System (ADAS) camera were not recalibrated to account for the different inputs from the vehicle resulting from the stretched frame. Therefore, when driving in a curve, the Electronic Stability Control (ESC) system, working together with the ABS, may react prematurely or be delayed in reacting and with the ADAS system activated, the Automatic Emergency Braking System (AEBS) and its accompanying warning light may be delayed in reacting and illuminating, therefore **increasing the risk of a crash**.

WHAT WE WILL DO

Your Isuzu dealer will recalibrate the ABS Control Module and ADAS Stereo Camera. This service will be performed **free of charge**.

WHAT YOU SHOULD DO

We recommend that you contact your Isuzu dealer to schedule an appointment. Although not necessary, please present this Owner Notification Letter at the time of your appointment or refer to Campaign Service Bulletin CB23-H-001A. We estimate that the remedy may take up to 1 hour 18 minutes to perform. Additional time will be necessary if the engine needs to be repaired or replaced. To locate the nearest Isuzu dealer, you can visit our website at www.isuzucv.com or contact our Customer Relations Department at the number listed below.
