IMPORTANT SAFETY RECALL (Interim Notice)

**Certain 2017 through 2021 Model Year Porsche Panamera Vehicles
Porsche Recall APA1 / NHTSA ID 23V-033**

Dear [REDACTED]:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Porsche has decided that a defect, which relates to motor vehicle safety, exists in certain 2017 to 2021 Model Year Porsche Panamera Vehicles.

What is the issue?

On affected vehicles, there is a possibility of humidity ingress into the external coolant pump for the climate control system. This could cause a short circuit and, in some instances, thermal damage to the external coolant pump. The thermal damage to the harness could progress if left unnoticed and increase the risk of a vehicle fire.

What will Porsche do?

To help prevent this issue from occurring, Porsche is conducting a safety recall to replace the external coolant pump on affected vehicles, free of charge. The plug-in connection for the pump will also be inspected for damage and replaced if necessary. This repair should take approximately 1 day to complete, however, it may be necessary to make your vehicle available to your dealer for a longer period of time. Your Porsche dealer will arrange for alternate transportation if necessary.

What should you do?

You can continue to use your vehicle until the remedy has been carried out

Porsche recommends, out of an abundance of caution, to park your vehicle outside and away from other vehicles or structures. Please do not press the "AUTO-REST" button in your center console.

If you do not feel comfortable driving your vehicle and/or parking it outside before the remedy is completed, please contact customer support as instructed below.
