### Why is your vehicle being recalled?

These vehicles may have left-hand half-shaft assemblies that are missing a retaining ring. If the retaining ring is missing, the half-shaft inner joint may separate from the shaft, which could result in a loss of propulsion and/or a loss of mechanical park. If the vehicle unexpectedly loses propulsion and/or mechanical park, there is increased risk of a crash or roll-away.

### What will we do?

Your Chevrolet dealer will replace the left-hand half-shaft assembly. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual service correction time of approximately 1 hour and 35 minutes.

### What should you do?

You should contact your Chevrolet dealer to arrange a service appointment as soon as possible.
