Details of the Recall

The instrument panel center cluster display on your vehicle may have insufficient backlighting due to incompatible vehicle components, making the instrument panel center cluster display not visible to the driver during daytime driving conditions.

FCA US will repair your vehicle free of charge (parts and labor). To do this, your dealer will replace the windshield and headlamp switch and add a light sensor module and a wiring jumper harness to allow the instrument panel center cluster display backlighting to function correctly. The estimated repair time is three hours. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience.

How do I schedule my [FREE](#) repair?

- ◆ Simply contact your Chrysler, Jeep®, Dodge or RAM dealer right away to schedule a service appointment.

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
