

SAFETY RECALL 20A: 2021-23 DODGE DURANGO (WD)

The rear spoiler on about 139,000 of these vehicles may be over-flush to the roof, allowing contact to the roof when cycling the liftgate.

Less than 2% of these vehicles are expected to require spoiler replacement. We're seeing significantly higher than expected orders – **please do not order spoilers for all vehicles** – you will only need to replace the spoiler on those vehicles that fail the inspection criteria.

If you have any questions on this please don't hesitate to reach out to your area manager or tech advisor.
