### Details of the Recall

The rear spoiler on your vehicle may be over-flush to the roof, allowing contact to the roof when cycling the liftgate. Vehicle occupants may hear the spoiler hitting the body when opening or closing the liftgate, or a rattle from the spoiler being loose while driving. An over-flush rear spoiler may become damaged when cycling the liftgate which may result in the spoiler becoming partially detached from the vehicle. Rear spoilers that become partially detached may separate from the vehicle while driving, potentially creating a road hazard to operators and occupants of other vehicles, and can cause such vehicles to crash without prior warning.

FCA US will repair your vehicle free of charge (parts and labor). To do this, your dealer will inspect and, if necessary, replace the rear spoiler. The estimated repair time is 1 hour. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience.
