Dear <FirstName LastName,>

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Hyundai has decided that a defect, which relates to motor vehicle safety, exists in certain **2012 – 2014 Model Year Veloster vehicles**. To ensure the safety of its vehicles for Hyundai customers, we are initiating Safety Recall 242 to repair a condition involving the RPAS on these vehicles in the U.S. Our records indicate that your vehicle is affected by this recall.

The purpose of this letter is to explain what the recall is about and to keep you informed of Hyundai’s recall implementation plan. We are currently preparing to implement the safety recall remedy which when available, will be performed at no cost to you. We will send you another notification when the remedy is available.

What is the problem?

The subject vehicles are equipped with a Reverse Park Aid Sensor (“RPAS”) that could develop an internal electrical short due to high conductive liquid leaking into the RPAS. An electrical short within the RPAS increases the risk of fire.

What should you do in the interim?

We appreciate your patience. Hyundai is currently preparing to implement the recall remedy to replace the RPAS fuse and sensor, if necessary. You will receive a second notification letter when the remedy is available. In the interim, if you experience a malfunction with the RPAS, you should seek service at your Hyundai dealer as soon as possible. If you have further questions regarding this recall or notice, you can reach out to Hyundai Motor America by calling **1-855-371-9460**. For updated information regarding this recall, please visit:
