New Safety Recall Advanced Communication – 28A

FCA US LLC (FCA US) has announced a safety recall on certain 2020 through 2023 Model Year (JL) Jeep® Wrangler vehicles. This recall applies only to the above short wheelbase vehicles (Body Style: JL72).

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with an unnecessary and unused frame stud that may contact the fuel tank in a crash, which, in certain circumstances, can cause a fuel leak. A fuel leak in the presence of a competent ignition source may result in a fire, increasing the risk of occupant injury and/or injury to persons outside the vehicle.

SERVICE ACTION

FCA US will conduct a voluntary safety recall on all affected vehicles to inspect and, if necessary, remove the frame stud and apply paint. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 1st Quarter of 2023.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
