SITUATION

BMW AG is conducting a Voluntary Safety Recall (effective May 11, 2023) on certain Model Year 2007 - 2014 MINI vehicles that were produced between November 16, 2006, and June 27, 2014.

Due to several contributing factors (environmental, certain US States' wintertime road treatment, vehicle design configuration and age), over time, the Footwell module (FRM) could become susceptible to corrosion.

The Recall Notice and Q&A have been attached for further information.

The bulletin will be updated when additional information becomes available.

Please be reminded that it is a violation of federal law (The Safety Act) for you to sell, lease or deliver any new motor vehicle covered by this notification until the recall repair has been performed. Note also that substantial civil penalties apply to violations of the Safety Act.

Also, you should not sell, lease or deliver any Certified Pre-Owned or used vehicles subject to a safety recall until the repair is completed.

Please follow any special instructions that we provide to you for the return or disposition of recall parts.
