Recall Campaign Initial Notification			June 9, 2023
Campaign No. :	NHTSA ID	Campaign Desc. :	Update Electric Drivetrain Software

<p>This is to notify you of the new Recall Campaign to update the electric drivetrain software on 8,281 Model Year (“MY”) 2022-2023 EQS, EQS SUV, and EQE (297, 296, and 295 platform) vehicles. The recall campaign will be visible on the www.NHTSA.gov website and may generate questions from customers. Affected VINs will be flagged in VMI as “PENDING” on June 9, 2023.</p>			
Background			
Issue	Mercedes-Benz AG (“MBAG”), the manufacturer of Mercedes-Benz vehicles, has determined that on certain 2022-2023 EQS, EQS SUV, and EQE (297, 296, and 295 platform) vehicles, under specific conditions, the electric drivetrain may be deactivated due to software fault management logic that does not meet current production specifications. A loss of propulsion cannot be ruled out, which could increase the risk of a crash. When the issue occurs, multiple warning messages are displayed in the instrument cluster.		
What We’re Doing	MBUSA will conduct a voluntary recall. An authorized Mercedes-Benz dealer will update the electric drivetrain software on the affected vehicles.
