## Supplier

Peterbilt

---

## Description

Interim Safety Recall - 567 and 579 Air Tank U-Bolts Chafing Fuel Tank

---

## Date

10/19/2023

---

## What's New

### Interim Safety Recall

Certain model year 2021 to 2024, 567 and 579 vehicles built from 06/22/2020 through 06/16/2023 were equipped with air tank bracket G11-6439-009 mounted behind a fuel tank without a frame spacer. The air tank mounting U-bolts are different lengths and may contact the fuel tank, which can result in a hole and the potential for a fuel leak. Leaking fuel may lead to an increased risk of a fire.

**At this time, parts are not yet available to complete the necessary repairs. Once parts become available, this bulletin will be updated.**

## Introduction

---

Certain model year 2021 to 2024, 567 and 579 vehicles built from 06/22/2020 through 06/16/2023 were equipped with air tank bracket G11-6439-009 mounted behind a fuel tank without a frame spacer. The air tank mounting U-bolts are different lengths and may contact the fuel tank, which can result in a hole and the potential for a fuel leak. Leaking fuel may lead to an increased risk of a fire.

**At this time, parts are not yet available to complete the necessary repairs. Once parts become available, this bulletin will be updated.**

## Situation

---

**1,326** (1,315 US and 11 Canada) Peterbilt model year 2021 to 2024, 567 and 579 chassis built from 06/22/2020 through 06/16/2023 with air tank bracket G11-6439-009, that are mounted behind a fuel tank without a frame spacer.

## Resolution

---

### Interim Safety Recall

**At this time, parts are not yet available to complete the necessary repairs. Once parts become available, this bulletin will be updated.**

## Federal Law

---

It is a violation of Federal law for a dealer to sell or lease new vehicles covered by this recall until the defect or noncompliance has been corrected.
