

Safety Recall 6223J – 2024 CX-90 and Mazda3(Japan) Rear View and 360 Camera Degree Images May Not Display Concern

CONDITION OF CONCERN

On certain CX-90 and Mazda3 vehicles, the images of the front-, side-, and rear-view cameras may flicker and, in some cases, may no longer appear on the center display monitor. Loss of front-, side-, and rear-view camera images when in reverse and/or using the 360-degree monitor can increase the risk of a crash. Reprogram the with improved software with the M-MDS, using MDARS, which will properly reset data memory when restarting the system, and camera images will appear properly on the center display monitor. There are 11,852 vehicles in the campaign.

REPAIR OUTLINE: Dealers will reprogram software of the View Monitor Camera (VMC) and push ODR data to Japan using MDARS after all software updates are completed

SUBJECT VEHICLES

Model	Subject VIN range	Subject production date range
2024 CX-90	JM3 KK *****100044 – 132978	From December 27, 2022 through September 5, 2023

NOTE: If the data is not successfully transmitted to Japan (collection of Diagnostic Information (ODR) to send to Japan to verify module software calibrations are present). The claim will be rejected and/or denied by the warranty system and will require the return of the car.

RENTAL CAR INFORMATION

Rental expenses exceeding the two-day limit or over the per day limit set by Mazda Warranty policy will require prior Warranty Department Authorization prior to giving the rental to the customer regardless of the reason. Please refer to the Mazda Rental Car Reimbursement Program policy in the Mazda Warranty Policies and Procedures Manual.

Mazda recommends the usage of the MCVP loaner vehicle when available. If all MCVP loaner vehicles are in use and unavailable, and the customer needs a rental car, then use your local rental facility and offer a rental car. Be sure that every effort is made to repair the car within one business day or less, so the next customer can receive the same experience.
