Recall Campaign Initial Notification			December 28, 2023
Campaign No. :	NHTSA ID	Campaign Desc. :	Replace High-Pressure Fuel Pump
TBA	23V878	23P2197660	
<p>This is to notify you of the new Recall Campaign to replace the high-pressure fuel pump on Z Model Year (“MY”) 2023-2024 GLC and GLE (254 and 167 platform) vehicles. The recall campaign will be visible on the www.NHTSA.gov website and may generate questions from customers. Affected VINs will be flagged in VMI as “PENDING” on December 28, 2023.</p>			
Background			
Issue	<p>Mercedes-Benz AG (“MBAG”), the manufacturer of Mercedes-Benz vehicles, has determined that in certain Model Year (“MY”) 2023-2024 GLE (167 platform) and GLC (254 platform) vehicles with the M254 engine, the bolting of the high-pressure fuel pump might not meet current specifications. In this case, the seal formed between the high-pressure fuel pump and tandem oil pump might be impaired. Thus, fuel and oil might leak and potentially spill onto the roadway, increasing the risk of a crash for the following traffic. If fuel or oil comes into contact with hot components, a risk of fire cannot be ruled out.</p>		
What We’re Doing	<p>MBUSA will conduct a voluntary recall. An authorized Mercedes-Benz dealer will replace the high-pressure fuel pump on the potentially affected vehicles.</p>
