## Repair Instructions:

### Access Breakaway Switch Wiring

**Tools Needed: Phillips Head Drill or Screwdriver, Socket and Ratchet Set**

#### REPAIR INSTRUCTIONS:

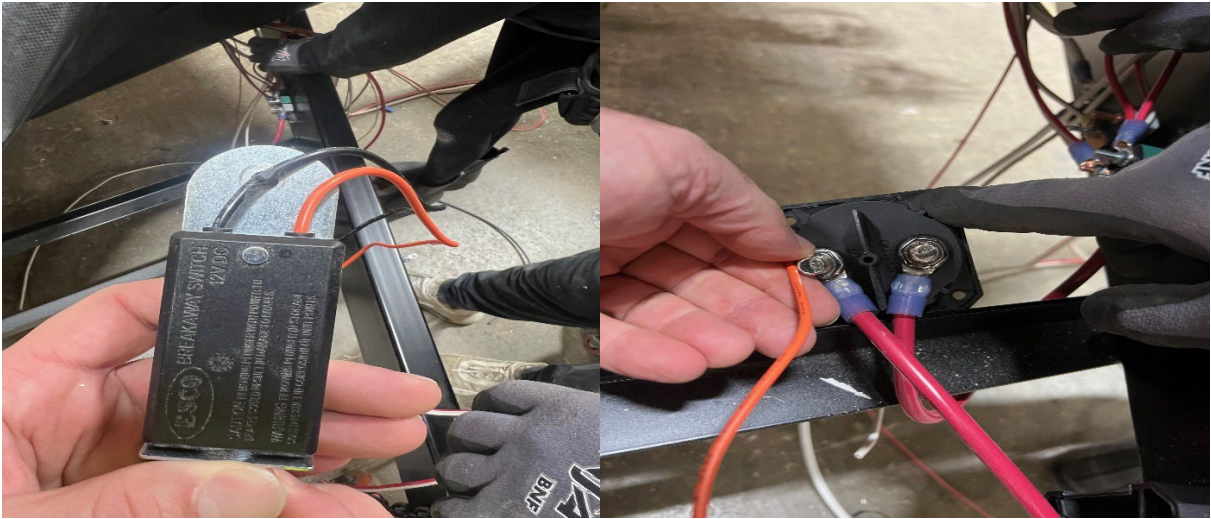

1. Using the Phillips bit remove the 2 screws from the cover of the 7-way box.

2. Locate the black wire on the breakaway switch and verify it's connected to the ground (white) post on the 7-way box.

3. Locate the orange wire on the breakaway switch and verify it's connected to the input (battery) side of the battery disconnect switch.
