ATTENTION: ALL DEALER PRINCIPALS

Kia America, Inc. has decided that a defect which relates to motor vehicle safety exists in certain 2024 MY Telluride vehicles manufactured from October 1, 2023 through December 6, 2023.

The engine valve springs may break while driving due to fatigue cracking as a result of damage to the springs during manufacture by the supplier. A broken valve spring may result in a loss of motive power, increasing the risk of a crash. Customers may experience abnormal engine noise, check engine light illumination, and engine running rough. In rare cases, a hole in the engine block may occur due to a broken valve entering the combustion chamber, increasing the risk of a fire.

All owners of the subject vehicles will be notified by first class mail with instructions to bring their vehicles to a Kia dealer. Kia dealers will replace the engine sub-assembly.

Your Service Manager was sent a copy of the owner notification letter and a Q&A guide for recall questions both of which describe the issue and information on how to access the list of affected vehicles. Kia will start mailing notices to the affected vehicle owners beginning on **April 5, 2024**.
