Date: Nov., 2015
Bulletin Number: MASxxxx 279
Supersedes: N/A
Section: Compliance

MASERATI

Model Type: Quattroporte
Model Year: 2014
Subject: Vehicle Safety Recall Campaign 279, Alternator-Starter Motor
Wiring Harness Check Replacement

MASERATI SAFETY RECALL BULLETIN

PERFORM THE PROCEDURE OUTLINED IN THIS TECHNICAL BULLETIN ON ALL AFFECTED VEHICLES BEFORE CUSTOMER DELIVERY OR THE NEXT TIME THE CAR IS IN THE SHOP FOR MAINTENANCE OR REPAIRS.

Maserati dealers must ensure recalls are completed after having been notified by Maserati North America, Inc. (MNA) that a safety-related defect or noncompliance exists in any motor vehicle or item of replacement equipment in the dealer's possession at the time of notification. In MNA's case, this notification would typically be made by the issuance of a recall notification in the form of a Technical Bulletin.

Under the National Traffic and Motor Vehicle Safety Act of 1966, as amended (or in the case of Canadian vehicles, Motor Vehicle Safety Act S.C. 1993, as amended), if a recall campaign is announced by MNA, dealers must ensure that all recalls on new vehicles and new items of replacement equipment are completed **BEFORE** delivery to the consumer. This means that dealers may not legally deliver new motor vehicles or new items of replacement equipment to consumers with an open recall.

The Safety Act also prohibits dealers from selling or leasing the motor vehicle or item of replacement equipment, unless and until the open recall has been completed **BEFORE** delivery. This also pertains to vehicles in the Certified Pre-Owned program, and to items of replacement equipment.

Finally, MNA dealers should not sell or use parts that have been recalled by MNA. Please follow the specific instructions provided by MNA on the return or disposition of the parts.

Description of Vehicle Safety Recall 279

Maserati S.p.A. and MNA have determined that the above described vehicle's, were potentially manufactured with an inconsistent cable layout/installation of the alternator-starter motor protective electrical insulation sealing cap (at the starter motor), and an insufficient number of starter motor cable portion clamps/straps. Note that this is a one piece cable design that branches off to the alternator as well. The alternator-starter motor electrical wiring harness cable is subjected to vehicle/engine vibrations. Through normal use, over time, and without the protective electrical insulation sealing cap in its proper position at the starter motor, and without additional cable securing clamps/straps, the alternator-starter motor cable attaching end may progressively become loose, with the potential to contact the surrounding surfaces of the engine block assembly. An incorrectly protected starter motor cable end in conjunction with a loose cable can lead to the alternator-starter motor cable damage and several electrical problems such as, intermittent electrical anomalies, no vehicle start and vehicle battery drain conditions. This can also include, in the most severe of cases, an engine compartment fire, potential for engine stalling and increase the risk of a crash.

Illustration of the Alternator-Starter Motor Wiring Harness

This repair procedure will be performed free of charge to the customer.

Which Vehicles Are Affected

Please refer to the attached VIN chart for the affected vehicles in the U.S. and Canada.

Vehicle Remedy Information

1. Check that the vehicle is included in the campaign, and that this repair has not been previously performed.
2. Replace the alternator-starter motor wiring harness following the procedure outlined in the Workshop Manual section 8.80.059.
3. The recall procedure is now complete.

Parts Needed For The Recall

For this campaign the Alternator-Starter Motor Wiring harness has to be ordered from the Maserati Parts Dept.

Clamp	P/N 244223	Qty. – 1
Cable tie for high temperature	P/N 206739	Qty. – 1
Starter wiring harness	P/N 307118	Qty. – 1
SCREW M6X14	P/N 282392	Qty. - 1

OPERATING PROCEDURE

1. Check if the vehicle is involved in the action and if the campaign has not been previously performed.
2. Remove the starter wiring harness as shown in the section 8.60.059 of the Workshop Manual.
3. Install the new cable and follow the instructions below concerning the starter motor area.
4. Disconnect starter motor electrical connection shown in the red circle in figure below.

5. Pass the cables over the starter motor and close the clamp (P/N 244223) around both cables as shown in figure.

NOTE: Cables to be closed with the clamp are part of engine cable (it is NOT starter wiring harness).

6. Insert the screw (P/N 282392) through the clamp and tighten it in the threaded hole indicated in figure.

7. Tighten the starter wiring harness nut and reallocate the red insulation cover shown in figure.

NOTE: Before to proceed ensure that cover is correctly placed on starter electrode.

8. Insert the cable tie through the duct and the connector of the starter motor tighten it. After tightening, cut the cable tie as shown in illustrations (following illustration sequence steps 1 through 4) below.

9. Reconnect the power cable to the alternator on the proper site indicated by the red arrow (the picture does not show the cover in order to better display the procedure).

10. Refit all the parts you have removed following the removal procedure in reverse order.

11. Procedure is completed

Entering A Warranty Claim

Fill in the relative Warranty Claims as follows:

- Campaign Number 279
- Warranty Code 24
- Defect Code 063
- Component Code 8.60.059
- Operation Code 8.60.059.9 (4.20h)
- Component Part Number See dedicated section
