

SSM 47003	2015-2018 Transit vehicles ordered with a keyless entry keypad arrive with the Ford Accessory keypad installed and programmed. Vehicles built prior to late January 2017 will have a cardboard box containing a master keycode card and personal entry code programming instructions stowed in the vehicle-s driver door pocket. Vehicles built after late January 2017 will have the cardboard box containing the card and instructions already stowed in the glove box. The master keycode card and programming instructions must be placed along with the other owner literature in the glovebox, for future reference by the vehicle owner. Certain U.S. dealer employees can retrieve lost keypad codes via FMCDealer.com - Parts and Service tab - Parts Product Line Information - Accessories - Keys/Entry Devices.
