

**SSM 48299 - 2016-2019 F-750 - Excessive/Pre-Mature/Uneven Front And/Or Rear Brake Pad Wear**

Some 2016-2019 F-750 vehicles may exhibit an excessive or uneven amount (inner versus outer) of front and/or rear brake pad wear. For vehicles exhibiting this condition, it's recommended to use FC4Z-2001-F brake pad kit when replacing front or rear pads. Some vehicle applications will demonstrate improved brake pad wear after installing this kit.
