### **2020 F-Super Duty - 6.7L - No Crank - Illuminated MIL With DTC P0087 And/Or P008A**

**Text:**

Some 2020 F-Super Duty vehicles equipped with a 6.7L diesel engine may exhibit a no crank concern with an illuminated malfunction indicator lamp (MIL) due to low fuel level or low fuel pressure. The most common diagnostic trouble codes (DTCs) associated with a low fuel pressure concern are P0087 and P008A. Prior to performing Powertrain Controls and Emissions Diagnosis (PC/ED) Section diagnostics for a no crank concern, verify the vehicle is not out of fuel or has a low fuel pressure concern. The no crank symptom after a low fuel pressure event is new for the 2020 model year.
