

## **SSM 49668: 2019-2020 Edge - Rear Wiper Motor Stays On**

Some 2019-2020 Edge vehicles may exhibit a condition where the rear wiper continuously operates. This may be due to a pinched or damaged wire in the liftgate where the harness enters the liftgate causing a short to ground. To correct the condition, inspect the area where the wiring harness enters the liftgate and repair any damage found to the wiring.
