

## **SSM 50939**

### **2022 Maverick - Front Driver Door Can Not Be Unlocked Using Intelligent Access - Built On Or Before 13-May-2022**

Some 2022 Maverick vehicles built on or before 13-May-2022 may exhibit a condition where the front driver door can not be unlocked using the intelligent access (passive entry feature). This may be due to the software in the body control module (BCM). To correct the condition, reprogram the BCM module using the latest software level of the Ford Diagnosis and Repair System (FDRS). For claiming, use causal part 15604 and applicable labor operations in Section 10 of the Service Labor Time Standards (SLTS) Manual.
