2021-2023 Bronco Sport Headlamp Light Above Horizon Pattern

All 2021-2023 Bronco Sport vehicles have a headlamp low beam pattern with a dark band above the vertical reference line. It is by design that there is no light directed in this area to satisfy regulatory requirements and also to minimize glare to oncoming traffic. Secondly, in the low beam pattern there is some light directed upward to satisfy regulatory requirements and also to assist with overhead sign visibility. This a characteristic of the vehicle. Do not attempt any repairs for this condition.
