

Don't Use Leak Check Dye in These Vehicles!

EDITOR'S NOTE: This article revises the one posted in **July 2015**. Changes are highlighted in **yellow**.

AFFECTED VEHICLES

General Information

Planning on using a leak check dye to help find a leak? Here's the current list of vehicles that you **shouldn't** use dye on.

Year/Model	Transmission Type
2013–14 ILX Hybrid	CVT
2014 RLX Sport Hybrid	DCT
2016 MDX	9-Speed A/T
2015 TLX	

At this time, we have not approved the use of leak check dye in these transmissions. If traces of dye are found in a failed transmission returned under warranty, your claim will be debited. For more information on which vehicles can use leak dye, see S/B 07-059, *ATF Leak Detection*.
