

## **In a Pinch, OK to Use ATF Type 3.0 in a 9-Speed Automatic Transmission**

### **AFFECTED VEHICLES**

All models with 9-speed automatic transmission

Although our service repair info specifically states that you must use **only** ATF Type 3.1 in a 9-speed automatic transmission, this ATF **isn't** yet available. If you're in a pinch, just use ATF Type 3.0 (P/N 08200-9016A) for now.

Of course, once Type 3.1 is available, you'll need to change the ATF back to Type 3.1 to ensure the best protection and performance.
