SUBJECT: Change to Front Strut Mounting Nuts

INTRODUCTION

This Service Information bulletin announces a change to the flanged mounting nuts securing the front strut assemblies to the vehicle body. The change was made to enhance assembly line efficiency.

PART INFORMATION:

The Old Style flange nuts with 3 “locking portions” have been replaced by the New Style “smooth” nuts..

NOTE: The nuts are interchangeable between new and old but it is recommended to use all of one style or the other to maintain uniformity. The torque specification is unchanged (14.8 ft. lbs.).

REMINDER: SOA strongly discourages the printing and/or local storage of service information as previously released information and electronic publications may be updated at any time. **Always refer to STIS for the latest service information before performing any repairs.**

CAUTION: VEHICLE SERVICING PERFORMED BY UNTRAINED PERSONS COULD RESULT IN SERIOUS INJURY TO THOSE PERSONS OR TO OTHERS.

Subaru Service Bulletins are intended for use by professional technicians ONLY. They are written to inform those technicians of conditions that may occur in some vehicles, or to provide information that could assist in the proper servicing of the vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do the job correctly and safely. If a condition is described, DO NOT assume that this Service Bulletin applies to your vehicle, or that your vehicle will have that condition.

SUBARU OF AMERICA, INC. IS ISO 14001 COMPLIANT

ISO 14001 is the international standard for excellence in Environmental Management Systems. Please recycle or dispose of automotive products in a manner that is friendly to our environment and in accordance with all local, state and federal laws and regulations.
