

The upper screen displays audio, navigation, phone information, and more. Use the interface dial to control and operate this screen.

The On-Demand Multi-Use Display (ODMD) is the center touchscreen that displays audio, phone, and climate control information.

Press the Talk button to say voice commands. Listen to a system prompt if desired, followed by a beep before saying a command.

When you want to say a voice command, the system explains that you can interrupt the voice prompt by simply pressing the Talk button again.

Audio improvements

Storing presets

When playing FM, AM, or SiriusXM® radio, tune to stations directly from the ODM preset screen.

Song information

Artist and track information is viewable, when available, on both the main ODM screen and preset screen.

Play modes

Basic audio functions (such as scan, random, repeat, sound settings, etc.) can be selected from the main ODM screen.

Audio source customization

Customize audio sources on the ODM screen in the order you want using the Edit Order option in the Audio Source screen.

Navigation improvements

Guidance volume adjustment

Adjust the guidance volume during guidance using the steering wheel volume dial or audio volume knob.

Address book/place category scrolling

Use the interface dial to scroll through your address book or a listing of place categories while driving.

Phone improvements

Phone pairing help

Helpful prompts appear during the phone pairing process.

Call option scrolling

Use the interface dial to scroll through and select numbers in your phonebook, call history, and speed dial list while driving.
