Automobili Lamborghini S.p.A.

Subject LTB L1XX.0.01.00.06 Readiness status reflashing

Model / VIN-Range

All Lamborghini models (Gallardo, Murciélago and Diablo) USA and Canadian versions from MY 1996 to MY 2004.

Information to the field

Due to a software malfunction, the readiness status of all the installed monitor components and systems are cleared at every Key off event on the above mentioned cars.

To solve this problem you must update the ECU software using the auto-running CD (compact disk) that you have received and following the hereby described procedure. Together with the CD you have a label for the warranty books and the exemption label that you should stick only on the engine bonnet of the four wheel drive cars.

The CD contains a complete list of the cars involved in this remedial action: to carry out the resetting operation, you will be requested to insert the VIN number of the car. It will be necessary to execute the remedial action on the cars listed on the CD only.

All Lamborghini Dealers and Licensed Service Point will receive a copy of the L1XX.0.01.00.06 CD, within week 35.

Field solution

Engine management software upgrade / Install IM Exemption Label as needed.

Spare Parts

No spare parts needed.

Warranty Claim data

You may find on Lamborghini Web Portal in the Warranty section "Available campaigns".

Campaign Code:	L140-A.07.06 (Gallardo)/L147-A.03.06 (Murciélago)
	L132-A.01.06 (Diablo)/L144-A.01.06 (DiabloRoadster)
Campaign Description:	Readiness status reflashing
Cost Code:	50
Component Code:	CCA0706 / A0306 / A0106 /A0106
Trouble Code:	220
Labour code:	CCA0706100 /A0306100 /A0106100 /A0106100
Labour Time:	0,5 h

Your Area Manager is at your full disposal for further informations.

Best regards

Customer Service

Necessary material

Auto-running CD-Rom L1XX.0.01.00.06 and the two labels that you have received as in picture 1.

Description of operations

- **1.1** Adopt all precautions to prevent car damages and to work safe.
- **1.2** Connect your LDT (Lamborghini Diagnostic Tester) tool (with LDAS32 v 2.12.256 or following installed) to the vehicle's CAN Line.
- **1.3** Turn the Ignition Key ON.
- **1.4** Insert the programming CD in the LDT tool's CD-rom drive bay.

The CD will start an autorun procedure, wait and follow the instructions shown on the LDT monitor as hereby described.

1.5 In case the PC has no communication with the car you will see the (screen 1) and a window will open showing a list of the possible causes of no communication (screen 2). Check and solve these causes to establish a communication.

Screen 9

1.10 Once the data uploading is completed, an informational window will appear showing the final result of the upload (green light = OK).

- **1.11** The Update is completed.
- **1.12** Remember to stick the recall label on the last page of the warranty book and the label of the all-wheel drive cars exemption on the engine bonnet as indicated in the next page.

Warning: the exemption label must be sticked only on all-wheel drive cars. Twowheel drive cars are excluded:

- MY98 132 Diablo (only vehicles having VIN ZA9**DU21**...)
- MY99 132 Diablo (only vehicles having VIN ZA9**DU21**...)

* CALIFORNIA REGISTERED VEHICLES ONLY

After this Service Campaign has been completed, the Authorized Lamborghini Dealers will issue a certificate "Proof of Correction", that is provided from Lamborghini, showing that vehicles have been corrected under this program. This certificate will be required to be provided by the customers to the California Department of Motor Vehicles as a condition for the next vehicle registration.
