Subject

BCM1 software update

Model

All Lamborghini Huracán 2015 starting from VIN FLA00163 to VIN FLA00500.

<u>Warning:</u> some vehicles included in this VIN range may not be involved, so check carefully on the Lamborghini WEB Portal (at the section named VIN Info) if the cars in your workshop or in your dealer stock are involved before performing any other operation.

Information to the field

As a result of continuous product monitoring, Automobili Lamborghini Spa has found that in "Corsa" drive mode the rear view camera stays on without any possibility to switch it off.

Field solution

Update software that manage central electrics BCM1

Warranty Claim data

The warranty reimbursement request for this rework action will be managed by the following standard Warranty Claim procedures.

Campaign Code: L624-A.03.15

Campaign Des.: BCM1 software update

Cost code: 50

Component code: CCA0315

Trouble code: 220

Labor code: CC0315100

Labor Time: 0,4h

Remember to fill all data in the section "Service and Recall Campaign" in the Warranty booklet of the vehicle as shown below.

Workshop instructions

The instructions contained in this bulletin are based on ODIS Service diagnosis software updated to release 2.2.3 and database Lamborghini 19.63 (see information bulletin BI.16.14)

Preliminary operations:

1. Make sure to be recently synchronized with Mirrorserver by checking the Last Sync date under:

http://mirrorserver/welcome

or under:

http://IP_address/welcome

if you didn't yet set up the mirrorserver IP alias

IMPORTANT

Make sure the last synchronization has been done after the 21st January 2015.

Pages 15

15. Wait until the data acquisition from all control modules is completed.

16. For the online authentication a valid GeKo account is necessary.

Be sure that your internet connection is working properly.

Click on "Done/Continue" to access the Login window

Insert your GeKo user name in the field "Login" and the pin 1324 + current 6 digit code displayed on your GeKo token in the field Password.

Then confirm clicking on "Adopt".

17. The communication is then established with the central server.

At the end of communication you receive following feedback:

"-software to be update has been detected (on 1 control unit)."

Click "Done/Continue".

18. Central electrics BCM1 Software Update

The example in the figure below refer to software part number and version of the BCM1 Software.

4H0907603DM; 0311

Click "Yes" to check the availability of the updated software on Your Mirrorserver.

19. Verify the new software data on the BCM1 ecu and click "Yes" to update.

IMPORTANT

Do not disconnect hardware interface from OBD plug and do not switch ignition OFF during the software update!

20. Wait until the update programming of the Central electrics BCM1 ECU is completed.

21. Once the update programming has been completed successfully a feedback as in the picture below is displayed.

Click "Done/Continue".

If the update programming has not been completed or has been unsuccessful:

- turn the ignition OFF;
- wait 1 minute before turning the ignition ON again;
- if offered by the program: select "Repeat" to retry the update programming, otherwise repeat the procedure from step 11.

Date: 02/20/2015

Pages 15

3. Select the position where you want to save the diagnosis protocol on your diagnosis laptop.

(default path can be changed under Admin and is set under ODIS Service installation folder).

Diagnosis protocol format is internet (.htm).

Click "Save" to save the protocol.

Click "**Print**" in the subgroup of buttons "*General*" to print the protocol directly on a pdf file (if available Adobe pdf) or in paper format by sending to an installed network printer

4. The diagnosis protocol has to be attached to the related Warranty Claim

(in order to insert the claim on the Web Portal, please refer to Warranty Claim Manual you can find under the Portal, Warranty section.

Trouble shooting:

- **A.** If the error message regarding the VAS5054 interface and the 2 icons for status of on board connection and key on are shown as in the picture below:
 - Click "Cancel";
 - Repeat the VAS5054 HW interface installation following the procedure (*) "VCI Manager v2.0", by entering in the menu "Extras" on the right side and clicking on "Diagnostic interface".

Date: 02/20/2015

Pages 15

- **B.** If one of the connection errors screens is shown as in the pictures below:
 - it is not possible to establish a connection with the central server. Please check carefully that the diagnosis laptop is properly connected to the internet network and retry clicking "Yes" or "Done/Continue".

- **C.** If the loss of connection happens during the target/actual comparison.
 - It is not possible to connect to central server, check the working connection of internet and retry by clicking "1".

- **D.** If the incorrect identification message is shown as in the picture below (error code: ODS1007E):
 - be sure that your Geko account is valid;
 - be sure that the label "Geko" is written on the token that you are using for the authentication;
 - be sure the Password inserted is correct;
 - click on Cancel and perform the application test (see document
 "ODIS_Checking_ConnectionServer_SV
 M_2.0" (*)).

doc. nr: L/V6_M06 Rev.[02]

To: Official After Sales Network Subject: BCM1 software update

Date: 02/20/2015

Pages 15

- **E.** If the infrastructure error message is shown as in the picture below (error code: ODS9212E):
 - be sure that your Geko account is valid
 - be sure that the label "Geko" is written on the token that you are using for the authentication
 - verify in ODIS settings you have "Internet" instead of "CPN" (see document "ODIS_Initial_Setup_2.0" (*))
 - click on Cancel and perform the application test (see document
 "ODIS_Checking_ConnectionServer_SVM_2
 O" (*))

If the same error was present during the application test, try following procedure:

- quit ODIS;

Rev.01

 Enter the folder C:\Program Files (x86)\Offboard_Diagnostic_Information_Syst em_Service\.automatic_sessions on your diagnosis laptop

- delete the only file present in that folder
- re-Start ODIS Service under following conditions:
 - 1. Network connection available;
 - 2. ODIS connection set on "Internet";
- Retry the application test and the SVM with your GeKO Token.

In the remote case there was still an error, retry the procedure with a second GeKO token, if available.

F. In the case the flash container is not detected (see figure):

- Make sure to be recently synchronized with Mirrorserver by checking the last date of Sync

http://mirrorserver/welcome

or under

http://IP address/welcome

if you don't have previously defined the "mirrorserver" IP address alias.

Make sure to be correctly connected with Mirrorserver.
