If you encounter a vehicle with the above condition, inspect the rear cargo interior trim, headliner, and spare tire area for signs of a water leak.

Once the water leak is found, repair any damage that may have been done due to the water leak.

Once the damage is repaired, apply seam sealer along the roof to body seam to correct the condition.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
