Random Error Messages

AFFECTED VEHICLES
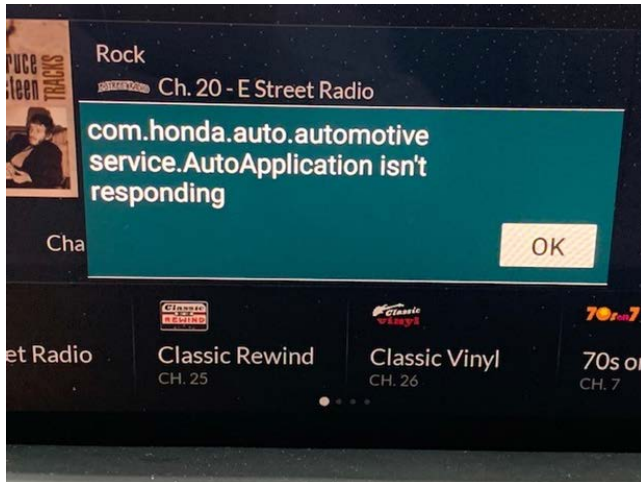

Year	Model	Trim Level
2022	MDX	ALL

Do you have a client who has a complaint of an error message **com.honda.auto.(application name) Application isn't responding or (application name) isn't responding.**

NOTE:

- Other symptoms may include Navigation slow to respond.
- Calculate or System Freeze when entering a navigation route using voice recognition.

This is a known software bug that can happen at random. Pressing the **OK** button will dismiss the message with no other effects on the vehicle. We are currently working on a software fix that will be released through OTA in the near future. Until the OTA is released there is no need to replace any parts.

END
