

2021MY Bronco
(ECG)
3.5.2

Big things are coming.

Alexa Built-in, the road-going version of Amazon's ever-helpful assistant, is coming to your vehicle soon. This update helps prepare your vehicle for Alexa Built-in and other future improvements. Stay tuned because another download will arrive soon to complete the process. Because of its complexity, this update may take longer than usual. But we promise you, it will be worth it.

Ongoing updates like this help you enjoy the best possible version of your Bronco® SUV.

2022MY Bronco
(ECG)
3.5.2

One of the benefits of owning a connected vehicle is that your vehicle is able to receive Ford Power-Up software updates. These updates are delivered wirelessly to your vehicle to help ensure you're always up to date with the latest features and technology. This particular update will set you up for future ones to come. Think of it as the update that opens the door for the others to enter through.

Some updates will happen in the background while you are driving, if you keep Automatic Updates ON. But others require your vehicle to be turned off, which means you can't be behind the wheel. So, we recommend you set a recurring schedule so they can occur when you do not need to drive — like, while you're sleeping.

Simply go to your in-vehicle SYNC® settings screen and confirm you have Automatic Updates set to ON. Then select Schedule Updates to set your recurring schedule.

Again, these software enhancements are there to improve your vehicle's overall capabilities, including entertainment experiences and new vehicle features, so you know you're always driving the best version of your new Bronco® SUV. Enjoy.

3.5.3

We've been super busy. Check these out.

Alexa Built-in

Yes, it's almost here. Most of Alexa Built-in has now been downloaded, with the final piece arriving in a few more days. Then you can wake Alexa up. Make a call, check the weather, interact with your smart-home devices, make a shopping list, ask for a joke. Just about anything you use Alexa for at home, you'll be able to do in your vehicle. Plus, add Ford Streaming and listen to music and podcasts too.

You'll know it's time to activate Alexa when the icon appears on your SYNC® 4 Technology screen. Just click on it and follow the steps to register. Keep in mind that your vehicle must have Enhanced Voice Recognition and an activated modem. And, of course, you'll need an Amazon account.

More good news: Your first three years of Alexa access are on us (streaming media services not included). That three-year clock starts ticking the moment the Alexa icon appears, so don't wait to set it up. You're gonna love it.

Go to your Ford Account or FordPass® App to learn even more.

Ongoing updates like this help you enjoy the best possible version of your Bronco® SUV.

We've been busy. Check these out.

Advanced Dual Phone

Access two phones at the same time without having to mess with the settings. You could, for example, easily access both phones for incoming calls, contacts, text messages, emails and more.

Digital Owner's Manual

We made sure what you need to know is in there and easy to find. Go see it on [Ford.com/support](https://www.ford.com/support), in-vehicle or in the FordPass® App.

Screen Resizing

When you're using Android Auto™ or Apple CarPlay®, you can now make them appear on your touchscreen in the size you prefer.

Rear View Camera

The functionality of your rear view camera has been improved. Feature availability varies by model. Ongoing updates like this help you enjoy the best possible version of your Bronco® SUV.

Android Auto is a trademark of Google LLC.

Apple CarPlay is a trademark of Apple Inc., registered in the U.S. and other countries.
