

2023 MY F-150
(ECG)
4.2.1

Here's the Latest Just for You

We've made improvements to the software update process, including the ability to enter your vehicle using your Key Fob during a non-drivable update.

You'll also now receive new pop-up alerts to inform you when a precondition is not being met so that you can take the required action to receive your update. For a non-drivable update, preconditions may include that your vehicle is parked, it's not running, all the lights are off, doors and trunk are closed, and you're not pressing the brake pedal.

Ford Power-Up delivers software updates that are designed to make your F-150® truck better over time.

Smart Changes Here and There

Convenience of Wi-Fi From Virtually Wherever

This Ford Power-Up software update allows you to connect to public Wi-Fi hotspots through SYNC®.

So, whether you're sitting in a restaurant's parking lot enjoying a lunch break, or outside of a retail store or coffee shop, you will be able to connect to public Wi-Fi through your SYNC screen. Then it's just a matter of being redirected to accept any terms and conditions and voilà – you're online.

Take advantage of this feature so you can download software updates faster, get seamless access to popular news and entertainment platforms and more, right on your in-vehicle screen. So, surf away and enjoy.
