## TECHNICAL OPERATIONS

**SUBJECT:** NAVIGATION HEAD UNIT REPLACEMENT ON SOUL EV

This article provides information regarding navigation head unit replacement on 2015MY Soul EV (PS EV). It is important to note that the head unit in this vehicle contains a modem and it should **NOT** be swapped between vehicles, under any circumstances. Swapping a head unit from one vehicle to another may result in a non-operational UVO eServices on one of the vehicles. The factory recommendation is to always order a replacement head unit from the PDC. After installation of the replacement head unit, activation of the eServices will occur automatically.
