This PI was superseded to update Subject Line and Diagnosis. Please discard PIP5096A.

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

Condition/Concern

A customer may come in with an SES light on and cam actuator code DTC P0014 or P0024: Exhaust Camshaft Position System Performance Bank 1 or Exhaust Camshaft Position System Performance Bank 2 set.

Recommendation/Instructions

If you get a vehicle with one of these codes, and no other drivability concerns, inspect the engine EUN sticker for an A before the sequence number; before replacing the actuator.

The engine EUN sticker should be located on the engine left side below the left head or on the back of the right head. (See the example below)

3291987

If there is an "A" before the sequence number then replace the OCV/Cam Actuator Solenoid Valve with a replacement "service" valve.

"DO NOT JUST SWAP FROM ANOTHER LOCATION."

The service OCV is from a different supplier and can make up the difference in the clearance that causes this concern.

If this does not correct the concern then continue with GSI diagnostics.

Warranty Information

For vehicles repaired under warranty, use:

Labor Operation	Description	Labor Time
4021730	Camshaft Position Actuator Solenoid Valve Solenoid Replacement - Bank 2 (Left Side) Exhaust	Use Published Labor Operation Time
