

TECH TIP: Door Lock Cylinder Location on Cadenza Vehicles

NUMBER: TT009

MODEL: Cadenza (VG)

DATE: 12/05/2013

Symptom: Dead battery--How do I enter the vehicle? There is no door key cylinder.

Repair: The key cylinder is located underneath a cover on the driver's door. To remove the cover, use the ignition key to depress the release button on the bottom of the cover, then insert the key as normal to unlock the door. For more information, reference Pitstop PS272.

Note: Tech Tips are not a substitute for proper diagnosis.
